

Adriana R. Mistodi

East London, Mobile: 07448172055

Email: adriana.mistodi@outlook.com

Personal Profile

I graduated in communication and public relations, which I gained the power of communications and public relations specialist.

I have successfully completed a funded Software Development Training course with Just IT Training. A twelve-week intensive bootcamp covering the fundamentals of Web and Software development. I am aiming to improve my skills further and grasp a better understanding of software languages (HTML (Hyper Text Markup Language), CSS3, JavaScript - Node.js, Python, SQLite, MySQL and MongoDB).

I would like to work as a Junior Developer to gain more skills and experience. I thrive working in a challenging environment to push my skills and limit.

Education and IT Training

November 2023 /Present **Just IT Training Ltd, London**
Digital Skills Bootcamp: Software Development
A twelve-week intensive bootcamp covering the fundamentals of Web and Software development.

Languages: **Visual Basic, Java and MySQL**

High School in Choreography - Classical BALLET

IT Skills

Software Development Skills: Java, Python, SQLite and MySQL

Web Technology: HTML5, CSS3 & JavaScript

Core Programming Languages: JavaScript and Python

Projects:

Created a functional magic 8 ball – fortune teller, that spins and it gives a different answer every time you click on the ball. I've created it with HTML, CSS3 and JavaScript and I experienced more how to work with animations and shadows in a more efficient way. This project can be accessed here: <https://adrianaa911.github.io/FortuneTeller/>

- ☐ Created a functional grocery-list, where you can create your own list and clear it as well. In this project, using HTML5, CSS3 and JavaScript, I've learned how to work more with media query (the background color changes when you make the screen smaller) and how to give functionality to a button. This project can be accessed here: <https://adrianaa911.github.io/groceryList-FinalVersion/>
- ☐ Created a Film application using Python and SQLite. This project allows you to view, add, update or delete a record by using the CRUD method. This Film application can be accessed here: <https://replit.com/@adrianamistodi/filmflixApp>

Employment History
